

The bathroom you have always dreamed of!

# The bathroom you have always dreamed of!

**Bathworks offers supply-only or full installation services. We bring you the best in dream bathrooms, shower rooms or en-suites.**

**We are a dedicated bathroom outlet offering ceramics, furniture, showers, wet rooms, tiles & lighting.**

Bathworks was formed in 2003 by Richard Banks and Lloyd Moulder in Milton Keynes. Both had been working for well-known manufacturers before deciding to venture out on their own. The Milton Keynes showroom has over 20 fully tiled display settings.

In February 2011, we opened our second showroom in Woodford Green, Essex. This showroom has more than 10 fully tiled room settings, showing some of the latest

products from selected European manufacturers.

### **Excellent Customer Service**

At Bathworks, we recognise that great customer service is just as important as the quality of the wide range of products we sell.

*It's why so many of our customers recommend us.*

Not only is there is a shower enclosure solution for every style and size of bathroom, from contemporary frameless walk-ins to more decorative options, you can also position a shower almost anywhere in the bathroom – so long as your plumbing allows it. A corner is an obvious choice, but fitting a shower in an alcove is also a possibility.

The traditional shower has always been a square tray surrounded by glass panels and a door, which slots snugly into a corner. This still works fine, but there are many other options available, too.

#### WALK-IN SHOWERS

The popularity of the walk-in and walk-through shower has grown significantly, driven by our desire to achieve a wet-room look without the expense of tanking the floor and walls. Comprising a simple glass panels teamed with a low-profile or concealed underfloor shower tray

#### RECESSED SHOWER ENCLOSURES

A recessed shower enclosure that fits between walls is an excellent solution for bathrooms, leaving the rest of the floor space free for other bathroom furniture. With the walls already in place, the only consideration needed is the type of shower screen preferred – fully enclosed or walk-in.

#### QUADRANT SHOWER ENCLOSURES

Quadrant enclosures are a great space-saving alternative to rectangular or square corner enclosures, taking the shape of a quarter circle, with either two sides of the same length and an offset option. These normally come with either 1 or 2 sliding doors.

*Most people do their singing in the shower...*

# FURNITURE

Bathroom furniture has become No. 1 on our clients' wish lists...

Most bathrooms or en-suites are lacking storage solutions. Bathworks offer a range of solutions to provide more cupboard space.

## FITTED FURNITURE

This can be a great solution for storage, as well as concealing any unsightly pipework. The fitted furniture can give you a seamless basin and work top option, giving you a much larger surface area.

Work tops can be supplied in a solid surface, incorporating a basin moulded into a one piece top. The solid surface material allows for shapes and sizes not available in ceramic options.

## MODULAR FURNITURE

Modular has now become the most popular option, as clients want to achieve that 'hotel' look. It allows individual pieces to be placed almost anywhere in the bathroom without the restrictions of fitted furniture.

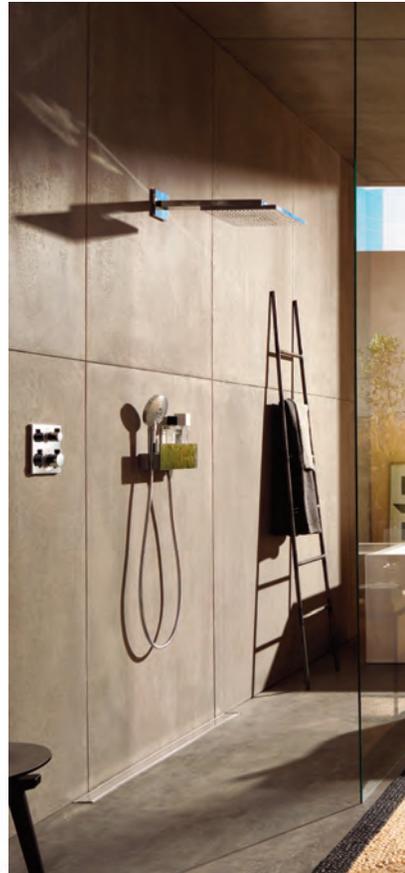

It can be either freestanding or wall hung and come with either drawers or doors. Many units come as standard with soft close doors or drawers for that real feeling of good quality.

## WASHBASINS

Probably the biggest option within the bathroom range products. Basins can be wall mounted, pedestal option, compact and corner versions.

If you can fit a basin into your bathroom space, the probability is Bathworks can supply a storage unit to sit under your basin.

Bathworks can offer a vast range of basins, also sit on bowls and furniture basins. It is important to match a small basin to suitable brassware.

There are various options for toilets, depending on location and the space available.

#### WALL HUNG TOILETS

A wall-mounted toilet is hung on a concealed frame, allowing a flooring to run underneath the pan. The cistern and frame are concealed behind boxing or a piece of bathroom furniture.

This creates a feeling of space, and makes the room easier to clean. An ideal choice for any bathrooms, en-suites and cloakrooms.

#### BACK-TO-WALL TOILETS (FLOOR STANDING)

A back-to-wall WC is designed to maximise space within the bathroom and present a sleek finish. Back-to-wall toilet pans are placed against a furniture unit or bathroom boxing, this can be tiled to blend in with the rest of the room. Concealing the cistern and piping allows for clean, minimalist lines and increased floor space.

#### CLOSE-COUPLED TOILETS

The most well known of toilet options, consists of a cistern that sits directly on top of the pan, which is then fitted to the floor.

A close-coupled toilet is a complete unit. The pipes connecting the cistern to the bowl are concealed within the toilet, giving it a sleek finish.

Choice ranges from streamlined, contemporary toilets, to traditional designs with period detail.

#### COMBINATION SHOWER TOILETS

New combined toilets/bidets offer a new standard of cleanliness, redefining comfort and hygiene.

Water jets can be adjusted to individual preferences from a simple remote control or by the touch of a button.

# TILES

**Bathworks have some fantastic bathroom tile ideas for any size bathroom area.**

Bathroom tile sizes vary from tiny mosaic tiles to gigantic tiles which can reach meters in length.

With tiles there are no rules as to sizing or how you set out your tiles. Landscape/portrait and brickbond are some of the options is using rectangular tiles.

Don't be afraid to use large tiles in a small room, bathroom tiles measuring 600mm x 300mm are now very common. Large tiles do work in a small en-suite or cloakroom.

There's plenty to choose from allowing you to get the perfect style, a variety of tiling patterns can be made to help enhance your room.

A new bathroom tile design will instantly add a new dimension to your bathroom, providing colour or pattern to your new bathroom area.

Tiled bathrooms can be simple but effective. Block-coloured tiles, either on the floor or on the bathroom walls, will look chic and sophisticated. Another option is creating a feature wall, or a coloured backdrop for a statement bath or basin.

Floor-to-ceiling tiling can turn a functional bathroom space into something far more appealing.

Tiles don't have to be the main feature of a bathroom. Use them to introduce a touch of interest or a splash of colour.

Mosaic tiles will add interest to any bathroom, whether made up of different shades or one block colour.

The choice is endless.

*Soak your troubles away...*

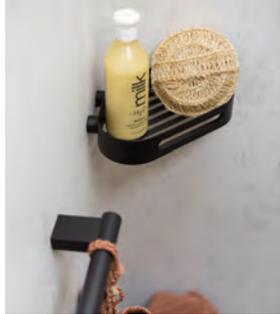

**The hallmark of great design is attention to detail.**

The right choice of bathroom accessories improves the design and function of the space. Bathworks can offer everything from towel rails and shelf's to mirrors and soap dispensers.

There is more to heating a bathroom than a towel rail, radiators can now be found in all different shapes and sizes.

Heated towel rails can be the difference between a damp towel and a soft, fluffy towel waiting for you after every bathroom visit.

That's the difference between a bad morning and a good morning.

Towel rails/rads can be supplied as plumbed in models, dual-fuel or electric only options. Dual fuel gives you the option of turning on a radiator even if the rest of your central heating is turned off.

Towel rails are available in various finishes, polished stainless steel, chrome and even colour to complement your tiles and decor.

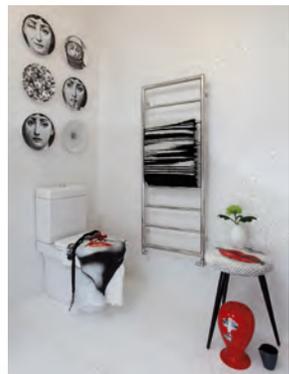

For those who want a more powerful radiator to heat a large room, Bathworks offer a range of designer radiators with towel hooks and rails built-in. All in both contemporary and modern designs.

No matter what available space you have, you'll find your perfect heated towel rail at Bathworks .

Explore our ranges, overflowing with the latest on-trend looks and timeless classics.

Discover striking shapes, confident colours and tactile textures: from understated chic to gloriously glamorous glitz .

We have products at all price points, whatever your budget: from affordable options to high-end luxury.

We specialise in the skilled installation of designer bathrooms, wet rooms and shower rooms to the domestic market in London and the south east.

No bathroom installation is too large or too small, from the more straight-forward projects, such as replacing an existing set of bathroom taps, to fitting a wet-room or moving plumbing and internal walls.

Our tradesmen have considerable experience in all the skills necessary to give your bathroom a polished and professional finish.

*The bathroom you have  
always dreamed of...*

#### Your New Bathroom.

How do you start to plan your bathroom, simple...

First we would ask if you can bring in, or email over some basic room dimensions.

All we need is a basic sketch for the room, showing door and window positions/dimensions (don't forget to measure the ceiling height).

Once you have given us your plans, also any images of the current room will also help.

One of the Bathworks team will use them to create 3D images of your new bathroom so you can

visualise it for yourself.

Once we agree on a layout for your new bathroom area, we can give you an initial quote for goods and estimate the installation if required.

The Installation price will be subject to a site survey.
